

I am very strongly opposed to Bellsouth's petition to end regulation of broadband services. If regulation is ended I will be stuck with only two options: Comcast and SBC. This is hardly what I call "competition." I would like to have as many choices as possible. With the regulation I am able to choose from a variety of providers. Because of this, I am now recieving better service and support from an independent local ISP. As a consumer the quality of service and support is very important to me. The end of regulation will do nothing but lower overall quality. I would like Bellsouth's petition to be denied. Thank you.
